## **DETAILED ACTION**

### ***Drawings***

1. Figures 1 and 2 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.121(d)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Specification***

2. The disclosure is objected to because of the following informalities: Please update the application serial number of the applications cited in the specification.  
  
Appropriate correction is required.

### ***Claim Objections***

3. Claims 1-42 are objected to because of the following informalities:  
  
In claims 1,8,15,22,30 and 36, lines 9,9,9,11,9 and 11, respectively, recite  $Hu^{-1}$  without further description with its relationship to  $Hu$ .  
  
In claims 2,9,16,23 and 37, the definition of  $Np$  and  $Nu$  needs to be recited.

In claims 4,11,18,25,32 and 39, the definition of  $u(i)$  and the operation,  $\oplus$ , performed with "bit" and  $u(i)$  needs to be recited.

In claims 5,12,19,26,33 and 40, recite  $M_1$ ,  $M_2$  and  $*$  without further description of the elements.

In claims 6,13,20,27,34 and 41, recite an equation with letters  $i$ ,  $s$  and  $M_i$  without further description.

In claims 37-42, delete ".,," and insert ".,".

Claims 3,7,10,14,17,21,24,28,29,31 and 35 directly or indirectly depend on claim 1,8,15,22,29 or 36.

Appropriate correction is required.

#### ***Allowable Subject Matter***

4. Claims 1-42 would be allowable if rewritten or amended to overcome the claim objections, set forth in this Office action.
5. The following is a statement of reasons for the indication of allowable subject matter:  
Present application discloses a LDPC encoder and method thereof comprising  $H_c$  Decomposer,  $u$  calculator and  $p=Pu$  calculator. The  $H_c$  Decomposer receives a user data, coupled to the  $u$  calculator, and providing  $H_u \bullet u$  and  $H_p \bullet p$  to the  $u$  calculator. And further the  $u$  calculator, coupled to the  $p=Pu$  calculator, provides the user data wherein the  $p=Pu$  calculator calculates the parity data. Prior art does not teach the combination wherein the  $H_c$  Decomposer decomposes  $H \bullet c$  into two

components wherein  $Hu \bullet u + Hp \bullet p = 0$ , and calculating the vector  $u = Hu \bullet u$  and parity data  $p = Hu^{-1} \bullet u$ .

### ***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Kromer et al. teach transmission of coded signal through parity matrix.

Thesling teaches encoding using parity check matrix of the code.

Laurent teaches method of constructing LDPC codes defined by a check matrix with M rows and N columns.

Holman teaches error correction code and a parity check matrix H.

Lee, IEEE reference, teaches generation of convolutional coding method generating matrix of the right and left inverse.

7. This application is in condition for allowance except for the following formal matters:

Claim objections, drawings and specification.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.
